MoodBoard

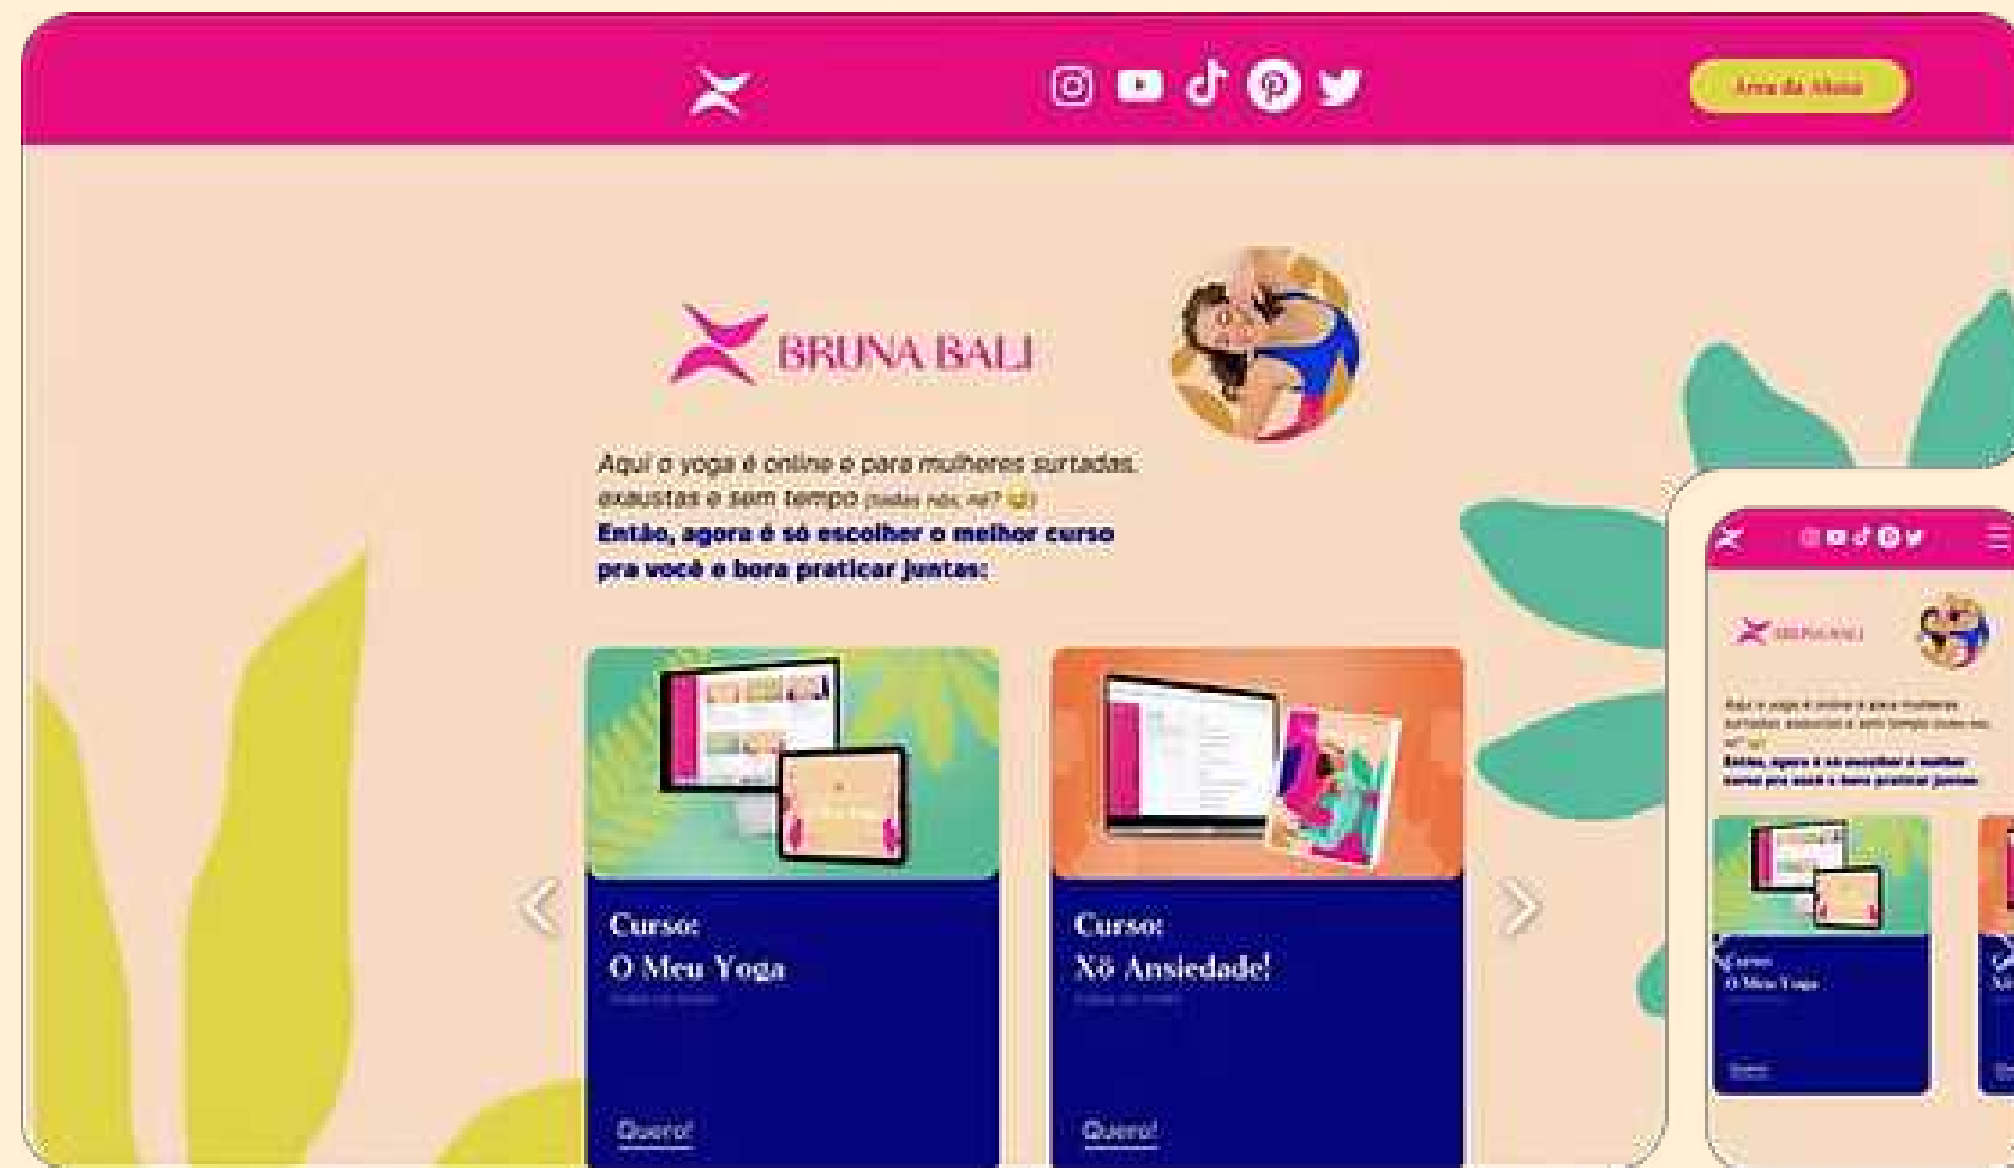

Quirky & Expressive

These were the first things that came into my mind when I saw this beauty. It is definitely a bit too much for a lot of running text, too eccentric for that. It's ideal **for posters, headings**, and other use case that have a moderate amount of reading text, not a blog.

Extra Light is Extra Lovely

You can express yourself even in small sizes. The power of optical sizing gives you what you need to keep it readable, even in captions. I recommend using the Medium weight here.
